2 Caution

- 2.1 Before installation, please check the unit for any damage in transport, and in particular that no foreign objects have become lodged in the end of the lens tube.
- 2.2 The unit should be mounted on the stand supplied using the spigot (or similar) and stood on even ground. The light should be raised up to shoulder height for operation.
- 2.3 The unit should be switched on in advance of it being required and left on for the duration of the performance. It is not suitable for frequent switching on and off which will damage the starter circuit and shorten the lamp life considerably.
- 2.4 You must wait for ten minutes after the lamp has been turned off to let it completely cool before the unit can be re-struck and used again as the lamp is of the 'Cold Restrike' variety.
- 2.5 In order to ensure the service life of the product, please keep it dry and ventilated.
- 2.6 There are no user serviceable parts inside the unit with the exception of lamp replacement. The product should only be serviced by professionals.
- 2.7 The Powercon mains lead must be plugged into the rear of the Followspot and into a permanent mains feed (13a socket outlet). This unit MUST NOT be plugged into a dimmer.
- 2.8 Do not stare at the lamp light source directly so as not to damage the eyes or down the lens tube, the lamp is extremely bright.
- 2.9 The Followspot is cooled by a quiet running fan in the rear of the unit. If this fan should fail the unit must NOT be used, but refer to a service agent for repair.
- 2.10 Make sure the power is disconnected prior and during the installation of a new lamp or service.

3. Dimensions: (mm)

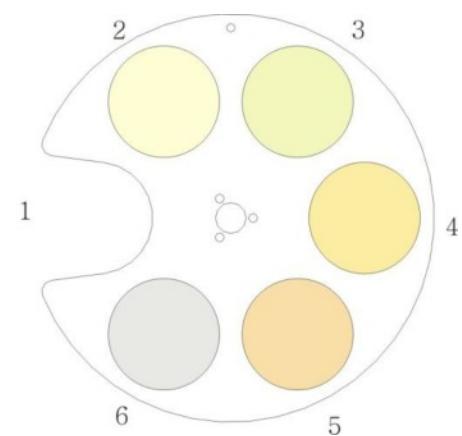

Colour Wheel:

01—White	02—Red
03—Yellow	04—Blue
05—Green	06—Magenta

Colour Temperature Wheel:

03—4300K	04—3800K
05—3200K	06—Frost

4. Product information

1. Technical Specifications

Lamp : YODN 15R 330W or SIRIUS HRI330W

Lamp life span: 1500hours

Output: 33486 Lumen at 5m - see chart below

Dimmer: Linear Electronic Dimmer

Colour wheel: Electronically Adjustable - 5 colours plus White

Iris: Electronically Adjustable from Small to Large Spot

Colour temperature: Electronically Adjustable: 3200-6500K plus Frost

Focus: Electronically Adjustable

Zoom Lens: Electronically Adjustable: 5-10 degrees

Rating: IP20 : For Indoor Use only

Power: 100-240V 50-60Hz Auto switching

Total power: 420w

External Fuse: 20ma 6.35a Ceramic Fuse

Light size: 918 x 348 x 314mm

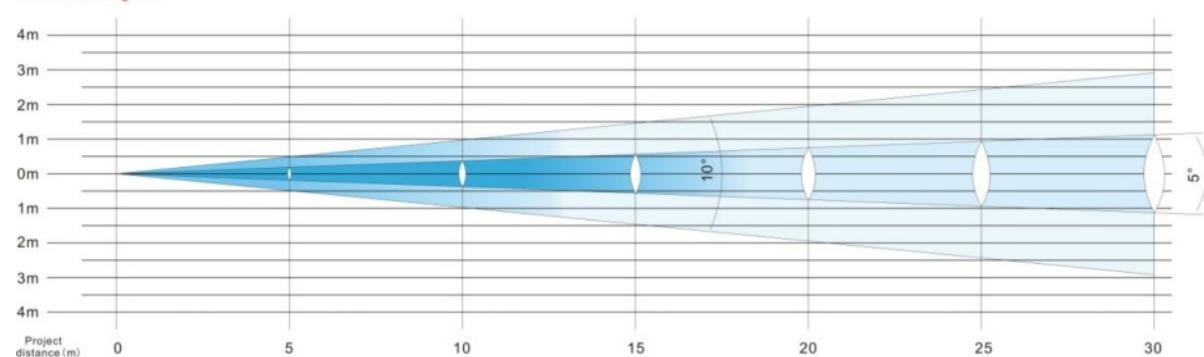

Product weight: 26kg

Stand weight: 6kg

Flight case size: 1022×580×490mm

5. Parts information

5.1 Control panel

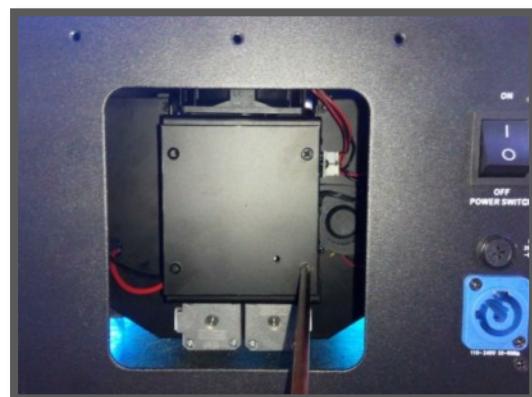

6. Lamp replacement

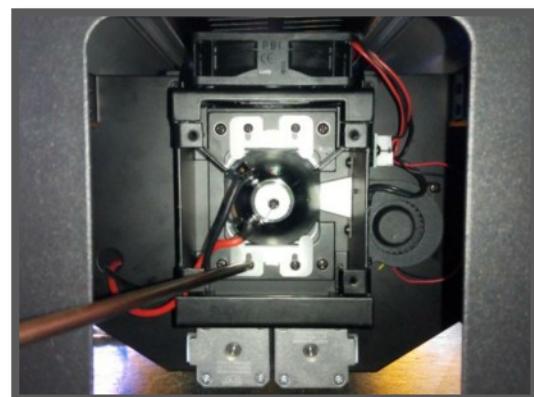

1. Remove the rear handle

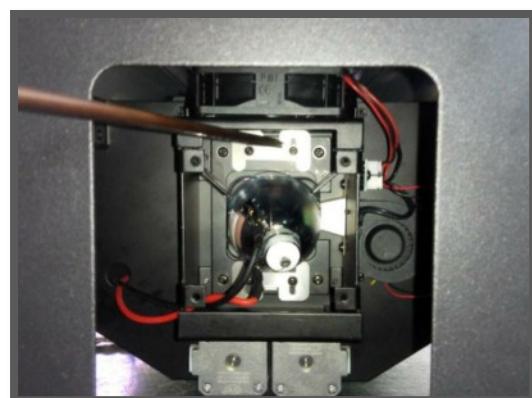

2. Remove the control panel box

3. Remove the lamp rear panel

4. Remove the screws for the lamp

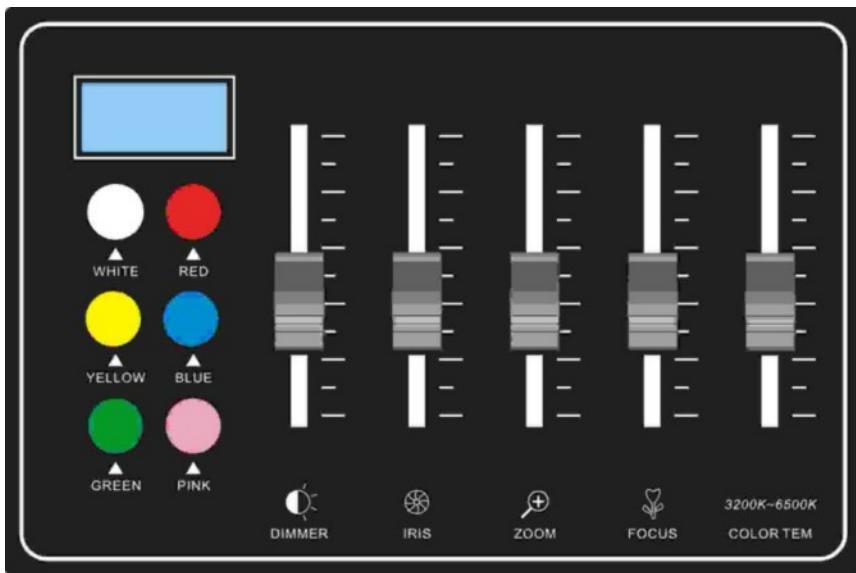

5. Use the screwdriver to hold the metal.

6. Remove the lamp power cable

7. Replace the lamp and rebuild in reverse order

7.0 Control panel

7.1 Operation

There is a hidden On/Off switch to prevent unauthorised use of the light. When the lamp is off, press the red key for 3 seconds, the display will show (on) and will strike. The lamp will take a few minutes to reach maximum brightness.

To turn the lamp off, press the white key for 3 seconds, the display will show (OFF) and will extinguish but the cooling fan will continue working.

Once the lamp is turned off, please wait about 10 minutes if needed on again. (This protects the unit and lamp from damage)

Fader	Display Value	Function
Colour Button	1	White
	2	Red
	3	Yellow
	4	Blue
	5	Green
	6	Pink
Dimmer		Dimmer
	0-50	Close
	51-130	Open - dim to full
Iris	0-255	Iris - small to big
Zoom	0-255	Zoom - big to small
